## Change & the Power of Conscious Multi Dimensional Living

Change is so incredibly important to your quality of life and never, in the history of this planet, has change occurred so quickly. You are a part of this change because you are an amazing being with incredible unimaginable abilities yet to be discovered. Your job is not to cope with change but to accelerate it. You are connected to all that is happening on the planet and when you awaken to your power, you can guide these changes. To best do this, you must understand your role in the personal, professional, and planetary transformation taking place. This participatory workshop will allow you to experience dimensional shifts and is based on the most current information available in this world and beyond. It will show you how to:

- Awaken to the power of change.
- Recognize how shifts in consciousness are impacted by you and how you are impacted by them.
- Understand your relationship to what is happening on the planet and how you can impact current events.
- Take dominion over your dimensional shifts and determine the quality of your life.
- Maximize dimensional shifts and minimize limitations.
- Claim your divinity so you too can walk on water.
- Look at where you were and where you are, to take control of where you are going.
